Opportunities for Tier 2/3 companies to showcase their capabilities & exhibit components to explore new possibilities

Product Categories

1. Localization

- Aluminum Piston & Swash Forging
- Aluminum seamless drawn tubes
- PV AC Rubber Hoses
- Friction material ring for compressor clutch
- Special grade Aluminum alloy extrusion & complex shapes with holes
- Sheet Metal with extra deep drawn using transfer press & Galvanized sheet.
- Special processes parts ex commutator & carbon Brush assembly's
- Fine blanking parts with continuous stacking
- Adhesive for metal bonding with air drying without any pressure

2. New Technology (EV Compressors)

- Invertors
- Controllers

3. Forging - Cold

- Steel Rotors
- Steel Hub
- Steel Shafts
- Aluminum tube connectors

4. Functional Parts

- Pressure Switch
- Pressure Sensors
- Pressure Relief Valves
- Rubber Parts HUB

5. Chemicals

- PTFE (Teflon Coating)
- Tin Coating
- Metaloc

6. Special Process

- Fine Blanking for Steel Valve Plate and other parts
- 2K tooling + Molding - Plastic Parts
- Progressive tool for stamping > 40 SPM & Die Casting tools manufacturers 350T - 1100T
- Transfer Stamping Parts with Tooling & Injection Molding Suppliers
