Automotive Component Manufacturers Association of India

The Automotive Component Manufacturers Association of India (ACMA) is a apex body representing India's Component Industry. It boasts a membership exceeding 850 manufacturers, contributing to more than 85% of the auto component industry's total turnover. **ACMA proudly holds ISO 9001:2015 certification.**

ACMA's primary mission revolves around stimulating growth, job creation, and economic prosperity. Through its relentless dedication to research & development initiatives, ACMA ensures that India maintains a leading position in global automotive component manufacturing.

With its continually expanding network, ACMA empowers businesses by providing invaluable resources, industry insights, and opportunities for collaborative endeavours. The organization plays an indispensable role in shaping policies and regulations that nurture an environment conducive to sustainable growth.

India's automotive industry is a vital sector, contributing 49% to the country's manufacturing GDP, 7.5% to the overall GDP, and supporting approximately 38 million jobs. Despite challenges like chip shortages, overbooking, fuel price-induced inflation, and rising commodity prices, the overall industry is valued at \$150 billion.

In the fiscal year **2022-23**, on the back of strong vehicle sales, a robust aftermarket, and growing exports, the auto component industry achieved unprecedented success. It reached a size of USD 69.7 billion (Rs. 5.60 lakh crore), recording a remarkable growth of 32.8%, surpassing the previous high turnover of USD 56.5 billion (Rs. 4.20 lakh crore) in FY21-22. Exports increased by 5.2% to USD 20.1 billion (Rs. 1.61 lakh crore), while imports grew by 10.9% to USD 20.3 billion (Rs. 1.63 lakh crore). The Aftermarket, estimated at USD 10.6 million (Rs. 85,333 crores), also saw steady growth, registering a 15% increase. Auto component sales to OEMs in the domestic market surged by 39.5% to Rs. 4.76 lakh crore.

This growth in domestic auto component sales to OEMs, reaching **USD 59.3 billion** (Rs. 4.76 lakh crores), reflects a 39.5% increase compared to the previous year. The demand for higher-value components and a shift towards larger, more powerful vehicles contributed to this growth.

In 2022-23, exports of auto components grew by **5.2% to USD 20.1 billion (Rs. 1.61 lakh crore)** compared to **USD 19.0 billion (Rs. 1.41 lakh crore)** in 2021-22. North America accounted for 32% of exports, with an 8% growth, while Europe (31%) and Asia (26%) saw 3% and 4% growth, respectively. Key export items included drive transmission and steering, engine components, body/chassis, suspension, and braking systems.

Domestic market traction also led to an increase in component imports into India, growing by **10.9% in 2022-23 to USD 20.3 billion (Rs. 1.63 lakh crore)** from **USD 18.3 billion (Rs. 1.36 lakh crore)** in 2021-22. **Asia represented 66% of imports, followed by Europe (26%) and North America (6%), with growth rates of 12%, 6%, and 23%, respectively.**

Post-pandemic, increased vehicle movement and demand for used vehicles boosted the aftermarket across all segments. The aftermarket turnover in FY 2022-23 reached USD 10.6 billion (Rs. 85,333 crore), compared to USD 10.0 billion (Rs. 74,203 crore) in the previous year.

ACMA plays a crucial role in the industry's development in India, actively engaging in trade promotion, technology enhancement, quality improvement, and information dissemination. It participates in international trade fairs, sends trade delegations overseas, and publishes materials on various automotive industry-related subjects.

ACMA also contributes to manufacturing advancements by offering skills training and mentoring through cluster programs & special projects such as 'Asset Turnover Improvement,' 'Uptime Improvement,' 'Zero Defect Quality,' and 'Sustainable Manufacturing,' among others. Additionally, ACMA is well-represented on various government panels, committees, and councils, helping shape policies and regulations for the Indian automotive industry.

For information exchange & cooperation in trade matters, ACMA has signed Memoranda of Understanding (MoUs) with counterparts in multiple countries, including Argentina, Australia, Brazil, Canada, Egypt, France, Germany, Hungary, Iran, Japan, Kazakhstan, Malaysia, Mexico, Nigeria, Pakistan, Poland, Russia, South Africa, South Korea, Spain, Sri Lanka, Sweden, Taiwan, Thailand, Tunisia, Turkey, the UK, the USA, & Uzbekistan.

GODI is a technology innovation organization focused on engineering and manufacturing of green energy storage solutions (battery cells and supercapacitors) based out of Hyderabad, India

Our aim is to reduce the kWh price to a greater extent with indigenous solutions at every layer of the clean energy puzzle. We are the India's largest R&D house in this domain, and have a team of 70+ led by 20 scientists(Ph.Ds.) who have vast expertise and experience in electro-chemistry, material science, thermal engineering, and advanced manufacturing

Set up in Jan 2020, we have grown very fast to address one of the most challenging problems facing in our times.

WHO WE ARE:

We are Deep Tech, Advanced Li/Na cell manufacturer and re-inventing age old traditional and toxic cell manufacturing with GODI's *Aqueous Electrode Processing™* and *Active Dry Coating™* and *Pranic Binder™* technology which are Environment-friendly & Carbon Neutral Process with significant reduction of CapEx and OpEx.

SONA COMSTAR

We are one of the world's leading mobility technology companies, designing, manufacturing, and supplying mission-critical, high-quality complex systems and components for both electrified and non-electrified powertrain segments. Our global presence and diversified product portfolio have enabled us to emerge as a 'partner of choice' for Original Equipment Manufacturers (OEMs) globally.

With a robust emphasis on research and development, we develop advanced drivetrain systems and high-performance motors for electric mobility. Additionally, we are developing mmWave radar sensors, perception solutions and full-stack embedded systems for autonomous and connected applications to enhance safety, efficiency and convenience. With our capabilities in precision forging, precision machining, high-fill multi-strand layered winding, product integration, machine learning and artificial intelligence, we provide high-power density electrical and mechanical systems, sensors, and embedded software solutions. With this distinctive expertise, we aim to be at the forefront of shaping the next generation of mobility technology and providing sustainable solutions for customers' evolving needs.

SPiRiT OF CHALLENGE

WHEN **ELECTRIC** IS A STATE OF MIND, **CHANGE** IS WHAT YOU DRIVE.

At Alkraft, driving change has been a fundamental tenet of our existence right from our founding three decades ago. Now, as the world is changing the way it drives, we are once again at the forefront, driving that change with Thermal Management Solutions for every Electric Vehicle and Charging Station.

With flexibility, scalability and modularity built-in to every product we design, we offer EV OEMs and Systems Aggregators fast-track prototyping and pilot launches with semi-tooled special process designs during their development and testing stages. Our deep expertise in thermal management for a wide array of applications place us in pole position to simulate, anticipate and solve thermal challenges faced by our customers. All of these when combined with our in-house capabilities in product validation for Cooling Performance and Reliability through tests involving vibrations, pressure cycles, thermal shock, etc, make a complete solution suite and start-up ready model that we call an '**Electric State of Mind**'. /alkraft.com

HOW TO USE

The page features a decorative diamond pattern in the top-left and bottom-right corners. The pattern consists of a grid of squares, with the squares in the pattern rotated 45 degrees to form a diamond shape. The squares are light blue with a subtle gradient and are separated by thin white lines. The text is centered in the white space between these two patterns.
