Automotive Component Manufacturers Association of India

The Automotive Component Manufacturers Association of India (ACMA) is the apex body representing the interest of the Indian Auto Component Industry. Its membership of over 850 manufacturers contributes to more than 85 per cent of the auto component industry's turnover in the organized sector. **ACMA is an ISO 9001:2015 Certified Association.**

ACMA's charter is to develop a globally competitive Indian Auto Component Industry & strengthen its role in national economic development as also promote business through international alliances.

The auto component industry which spans across different geographies of the country, is a large, integrated and complex network of suppliers. Today, it contributes **2.3% of the country's National GDP, 25% of the national Manufacturing GDP** and employs over five million people. The industry is dominated by SMEs, is one of the key drivers of India's economic growth and the 'Make in India' program.

The auto component industry manufactures a wide variety of products including engine parts, drive transmission and steering parts, body & chassis, suspension & braking parts, equipment & electrical parts, besides others.

The vehicle industry in India witnessed two successive years of de-growth of **14.6 per cent in FY19-20 and thereafter of 13.6 per cent** in FY20-21. The economic slowdown of FY19-20 was compounded by the challenges of a pandemic led national lockdown in FY20-21 resulting in decline in vehicle production & consumption. In tandem the component industry turnover in the first quarter of FY20-21 was a complete washout, the industry regained significant ground second quarter onwards, posting a subdued performance in FY20-21 with de-growth of 3 per cent over the previous year, **registering a turnover of Rs.3.4 lakh crore (USD 45.9 billion).**

The sales to OEMs, in the domestic market stood at **Rs.2.79 lakh crore (USD 37.7 billion), declining by 3 per cent**, when compared to the previous year. Sales to OEMs in the H1 2021 had declined by **31 per cent over the first-half of the previous year**, however it witnessed a healthy recovery in H2 2021.

Exports of auto components witnessed degrowth of **8 per cent to Rs.0.98 lakh crore (USD 13.3 billion)** in 2020-21 from **Rs 1.02 lakh crore (USD 14.5 billion)** in 2019-20. **Europe accounting for 32 per cent of exports, saw a decline of 4 per cent**, while North America & Asia, accounting for **30 per cent and 26 per cent declined 7 per cent and 8 per cent respectively.**

Meanwhile, slowdown in the domestic market also reflected on imports of component into India. **Component imports fell by 11 per cent to Rs.1.02 lakh crore (USD 13.8 billion)** in 2020-21 from **Rs.1.09 lakh crore (USD 15.4 billion)** in 2019-20. Asia accounted for **66 per cent** of imports followed by **Europe and North America at 25 per cent and 7 per cent** respectively. Imports from Asia declined by **9 per cent**, while those from **Europe by 13 per cent and from North America by 17 per cent.**

The two-wheelers & passenger vehicles segments of the aftermarket witnessed strong recovery, revival in the commercial vehicles aftermarket was less than expected leading to an overall **decline of 7 per cent in the aftermarket.** The turnover of the aftermarket in FY 20-21 stood at **Rs. 64,524 crore (USD 8.7 billion)** compared to **Rs. 69.381 crore (USD 9.8 billion)** in the previous year.

The expected outlook for the FY 22, provides a glimpse of hope, with steady economic recovery and enhanced focus on vaccination, consumer sentiment seems to be bouncing back. Whilst demand seems to be returning to the automotive sector, some of the key projection for the different category of vehicles are: Passenger vehicles are expected to **register a growth of 8 – 10 per cent, commercial vehicle is expected to bounce back**

strongly with 20 per cent growth, while the two wheelers may register 5 per cent degrowth and farm equipment & tractors may remain flat in the FY 22. In this backdrop, the component industry is expected to grow in the range of 10 - 15 per cent respectively.

ACMA's active involvement in trade promotion, technology up-gradation, quality enhancement & collection and dissemination of information has made it a vital catalyst for the component industry's development in India. Its other activities include participation in international trade fairs, sending trade delegations overseas and bringing out publications on various subjects related to the automotive industry.

ACMA is represented on a number of panels, committees and councils of the Government of India through which it helps in the formulation of policies pertaining to the Indian automotive industry.

For exchange of information & for co-operation in trade matters, ACMA has signed MoUs with its counterparts in **Argentina, Australia, Brazil, Canada, Egypt, France, Germany, Hungary, Iran, Italy, Japan, Kazakhstan, Malaysia, Mexico, Nigeria, Pakistan, Poland, Russia, South Africa, South Korea, Spain, Sri Lanka, Sweden, Taiwan, Thailand, Tunisia, Turkey, UK, Italy, USA and Uzbekistan.**

Further information and data on the Indian automotive industry is available on the ACMA

PROFILE OF EXHIBITORS

Company Profile

Founded over 50 years ago, the company has taken massive strides in various aspects of technology with great aplomb. Today AIP is a leader in the production of pistons & rings for automobiles (mainly two /three wheelers), chainsaws, brush cutters and air braking compressors. It is a major OEM supplier for many reputed vehicles and engine manufactures of the country and overseas including USA, Japan, Europe and China.

AIP provides patent applied for technologies—1Electroless Nickel based coatings for Pistons & Cylinders2. High Pressure Die Cast Pistons in hyper-eutecticAl-Si piston alloys.

Currently the company exports nearly 50 percent of total turnover which makes AIP a global player.

Location of Plants: Ghaziabad

Year of Commencing Production: 1968

Trade Mark: AIP

Quality Certification: IATF 16949, ISO 9001, ISO 14001 & ISO 45001

Turnover (2020-21 in US \$ million): 15.30

Export (2020-21 in US \$ million): 8.10

Number of Employees: 356

Products Manufactured: Pistons & Piston Rings

Supplying to Aftermarket: South America, Europe, Africa

Principal Automotive Customers:

Domestic (OE / Tier 1): Maruti Suzuki India Ltd., Honda India Power Products Ltd. Yamaha India Limited, TVS Motor Co. Ltd.

International (OE / Tier 1 / Systems Integrator): Husqvarna Forestry NA, USA; Husqvarna Zenoah Changzhou Machinery Co. Ltd., China; MTD South West Inc., USA; Husqvarna Zenoah Co., Japan; Emak Spa, Italy; STIHL Inc, USA; STIHL Ferramentas Motorizadas Ltda, Brazil, Knorr-Bremse, France, Knorr-Bremse, Brazil.

New Products on Display: Plated Aluminium cylinders

Company Profile

More than two decades of experience in tubular products, sheet metal parts and machined components.

From Simple tube bushings to precision engine mounting assembly, we use the latest technology to produce the entire range of parts –Automotive Machined Tubular Parts, Sheet metal and fabricated parts. Our Major Customers are Endurance Technologies Ltd, Gabriel Indial Ltd, JBM, Sharda Motor etc.

Year of Commencing Production: 2017

Turnover (2020-21 in US \$ million): 268036

Number of Employees: 33

Products Manufactured: Service: Conversational AI - Building connected cars experience

Principal Automotive Customers:

Domestic (OE / Tier 1): Honda Cars India Ltd., Maruti Suzuki India Ltd., Hyundai Autoever India Pvt. Ltd.

Company Profile

Agrim Components Pvt. Ltd. is a leading manufacturer and supplier of Rubber & TPU Suspension Components, Rubber to Metal Bonded Bushes, PU Suspension Bushes, Rubber Bushes, Stabilizer Link Bar, Rubber, Plastic & TPU Components with IATF 16949:2016 & Maruti Green Certification with 2 Plants based at Faridabad. We are a well-established fast growing company, supplying High Quality Components to Leading Manufacturers for OEMs/Tier 1 Automobiles industry.

Vision

- To maintain market leadership of cold forged fasteners.
- To increase significant business in Exports specially in PV & CV Segment.

Mission

- Customer delight
- Distinctive Products, Customized.
- Technologically advanced and innovative
- Operational excellence
- Maintain long term association with vendors
- Enjoyable workplace
- Responsible towards community

Values

- Customer first
- Adaptability
- Accountability
- Integrity
- Innovation
- Communication

Year of Commencing Production: 1960

Trade Mark: AMALGAMATION

Quality Certification: IATF 16949, ISO 14001, OHSAS 18001

Turnover (2020-21 in US \$ million): 150.00

Export (2020-21 in US \$ million): 20.00

Number of Employees: 3000

Products Manufactured: Engine Components: Piston, Piston Rings, Liners, Thin Valves bearing, Piston Pin & Crank Pin

Transmission Components: Bevel Gears, Clutch, Clutch Assemblies, Cranks shaft, Cam Shaft & Near net shaped forging components

Supplying to OES & Aftermarket: OES - TML, AL, TAFE & Aftermarket - India, Middle East, ASEAN, SAARC

Principal Automotive Customers:

Domestic (OE / Tier 1): Toyota, Hero, Tata, Leyland, Maruti, Suzuki, Honda, Piaggio, Volkswagen, Hyundai, Mahindra, Royal Enfield, Stellantis, Renault Nissan

International (OE / Tier 1 / Systems Integrator): AAM, DANA, VALEO, JOHN DEERE, HATTA TURKEY, PITTERI, KUBOTA

New Products on Display: Piston Rings, Forging components

Company Profile

ANAND is a global leader in the manufacturing of world-class products for the automotive industry. In 1961, ANAND started its journey as a shock absorber manufacturer; six decades hence, nearly every vehicle on Indian roads and several globally, carry within them a part of ANAND. With the widest range of solutions, ANAND has gone boldly where few others have ventured, establishing 13 Joint Ventures and 7 Technical Collaborations. While India is our hub of business activity, international OEM customers and a significant Aftermarket presence worldwide, make us a truly world-class automotive player.

Company Profile

1.0 Introduction

- Atop Fasteners Private Limited (AFPL) was established in 1988 with the manufacturing of Machined components in Chandigarh.
- In 1992 Spring Washers, Wave Washers and Split Pins were added in manufacturing range.
- To enhance production capacity, another plant was set at Mohali (near Chandigarh) in 2001 where Sheet Metal components (mainly of Spring Steel), Circlips were added in its product range.
- Over the period till now latest machinery & IMT equipments are being added to current stock in every area every year as a part of our Quality Policy.
- Atop has been certified as IATF 16949:2016 by TUV SUD.

2.0 Quality Policy

Quality to be accorded high priority to ensure market competitiveness, stable growth and to enable timely supply of Cost Effective Quality Products to the Customers.

This shall be reflected by our commitment to continuously enhance Customer Satisfaction through :

- Continuous Improvements in Product Quality
- Meeting Complete Range of Customer Requirements
- Delivery at Right Time Once & Always
- Timely Communication
- Employee Training & Motivation Continuous Up-gradation of technology & systems.

Company Profile

Brakes India was established in 1962 and has grown to be the largest manufacturer of brake systems in India. As part of the \$2.5 bn T S Santhanam family group, with lineage from the erstwhile TVS Group, Brakes India is headquartered in Chennai with 15 manufacturing plants across the country, catering to local and multinational OEM customers across the passenger cars, light vehicle, commercial vehicle, tractors and the off-highway segments. With a well-equipped R&D centre capable of designing, developing, testing and validating products, the core strength of Brakes India lies in its adaptation of products for specific markets in India and abroad depending on the needs of the market, conditions and customers. Apart from being a strong player in the OEM space, Brakes India is the market leader in the aftermarket with a large range of products. In addition to domestic Indian market, has been exporting Brake parts to Nepal, Bangladesh, Europe.

About the TSF Group: The TSF Group houses the companies managed by the T S Santhanam family, whose lineage stems from the erstwhile TVS Group. The group has diverse investments across financial services, automotive components, vehicle dealerships and parts distribution. The group portfolio includes Sundaram Finance, Sundaram Finance Holdings, Sundaram Home Finance, Royal Sundaram, Brakes India, Wheels India, Turbo Energy, Sundaram Motors, Axles India, Madras Auto Service and IMPAL, few of which are publicly listed entities. The group has revenues of ~\$2.5 billion, employs over 37,000 people across 1100 locations and is renowned for its long-term business outlook, corporate governance, sustainability and social responsibility.

Company Profile

ECL started their journey on Indian roads in 1980 via Hero Majestic by introducing magnetos and flashers at Ludhiana. Later ECL expanded its horizons to high tension ignition coils, Stators Assemblies, CDI Units (Both Digital and analogue), Horns, Relays etc. Their products are functioning successfully on millions of 2Ws on Indian roads and abroad. All necessary ARAI approvals are assured for OEM's supply. For last 10 years ECL has also been exporting their products to more than 10 countries for OEM's and replacement market with high success rate.

ECL has an ultra-modern plant with its state of art technology to manufacture its high quality & precision products. With years of experience behind them, ECL team has managed to give its products an upwardly mobile image in the market. ECL stands for products of high quality at a reasonable price with assured & timely service. ECL is responsive to customers' needs ECL develops, manufactures and supplies high tech quality products to enhance the productivity and reduce cost.

New Swan Enterprises

Company Profile

"New Swan is one of the leading manufacturers of fine blank, sheet metal parts and sub-assemblies"

New Swan has grown steadily under stable leadership, sound business practice and corporate culture since its inception in 1985 and strive to be the best in the industry.

The core strength of organization resides in the knowledge, dedication and values of people. The value of our products is complemented by large scope of manufacturing capabilities. New Swan will embrace all future challenges with the same enthusiasm and dedication that has brought us today's level of competence. New Swan has never stopped striving for New Technologies, based on the principles of management; we made good foot prints in automotive sector since its inception in 1985. "Never Say Die" philosophy of New Swan has enabled us to be a leading manufacturer of Sheet metal, Fine Blank parts and assemblies.

We are ISO/TS 16949 and ISO 14001 Certified.

"We are very well positioned in India and our technical and manufacturing skill gives us edge over competition"

Company Profile

Founded in 1965, NRB Bearings was the first company to manufacture needle roller bearings in India. Today 90% of vehicles on Indian roads run on NRB parts. Since inception, NRB has grown to offer a wide range of high precision friction solutions across mobility applications. NRB has close to 70 percent market share in India for needle bearings and globally is a market leader in automotive cylindrical bearings with a growth rate of 46% in this segment.

Built on world-class engineering and quality-driven manufacturing infrastructure, NRB today has 7 plants in India and 1 in Thailand. Its supply logistics enables it to export all over the world, and today it supplies bearings and allied products to customers in 45 countries across 5 continents.

Company Profile

RULL's first plant was established in the year 1990 in technical collaboration with Union Oil Company of California (USA) with an installed capacity of 1,44,000 KL/PA, making it one of the largest plants at a single location in the country. The plant is spread over an area of 10 acres and is equipped with unique features which facilitate strict quality adherence, minimum exposure of the produce to environment and human touch thereby giving the product a superior quality edge.

The plant can blend all Automotive, Industrial, Marine, Specialty Oils, Greases and Aviation Oils in the shortest possible time and the in-house state-of-the-art testing facility enables the plant to adhere to strict quality control.

RULL also does private Labeling/Toll blending for more than 25 Indian/International Brands on a turnkey basis.

Company Profile

Born of Entrepreneurial spirit in 1985, Suprajit today has carved a niche for itself as a pioneer in the design and manufacture of Mechanical Control Cables and is recognized as India's largest cable maker and worlds largest in the two-wheeler cable market. As a part of its Strategic expansion into Non-Automotive-Cables and Controls market Suprajit acquired Wescon Controls Inc USA in 2015 and had also diversified into Automotive Lighting business through acquisition of Phoenix Lamps Limited in 2014. Suprajit Group comprises of Suprajit Engineering Limited, Suprajit Automotive Limited, Suprajit Europe Limited, and Phoenix Lamps Limited. The group is a global leader in the automotive cable and halogen bulb industry. With the most competitive manufacturing base in India, and its technical and logistical supports worldwide, the group provides the optimal product development and manufacturing solutions to its domestic and international customers.

Head Quartered in Bangalore- India Suprajit has transitioned from a single product, single customer, single segment, single brand, single location company to a multi-product, multi-business, multi-customer, multi-brand, multi-location global company making it truly diversified without sacrificing its tenets on Quality, Cost, Delivery and Development. It is driven by its single-minded goal of "Customer Satisfaction" and in this pursuit of excellence it continues to be recognized as "Value for Money Supplier" to customers across the spectrum.

The Suprajit Group is a global leader in the automotive cable and halogen bulb industry. With a competitive manufacturing base in India, UK, US and Mexico, along with our technical and logistical supports worldwide, the group provides the optimal product development and manufacturing solutions to its domestic and international customers. The Group comprises of Suprajit Engineering Limited (which includes Phoenix Lamps), Suprajit Automotive Limited, Suprajit Europe Limited, Wescon Controls LLC, and Suprajit Inc USA.
